How to Use This Log

WRITE IT DOWN WHEN IT HAPPENS • SHARE IT WITH EVERYONE WHO HELPS

One log, kept in one place, means everyone who helps with care knows what happened today: what was eaten, which medicines were given, how the day went and what the next person needs to know.

EACH DAY

- Start a new daily log page each morning and keep it where everyone can find it.
- Write each meal, drink and medicine at the time it happens, not later from memory.
- Tick the personal care that was done, and note anything new: a sore spot, a cough, a fall or near miss.
- Before you leave, fill in the notes for the next caregiver.
- At the end of the week, copy the main points onto the weekly summary and take it to appointments.

MEDICINES

- Record only what was actually given, with the time and who gave it.
- Give medicines exactly as prescribed or as the label says. This log does not tell you what to give.
- If a dose is missed or refused, write it down and ask the pharmacist or doctor what to do.

Call 911 right away for:

- Chest pain or pressure, or trouble breathing
- Sudden weakness or numbness, a drooping face, confusion or trouble speaking
- A fall with an injury, a blow to the head, or being unable to get up
- Being very hard to wake, or not responding

For any new or worsening change, call the doctor or nurse.

Care Details
